

**FOOTBALL COACHES AUSTRALIA INC**  
**Coaches Matter – Community – Connection – Camaraderie**  
**(CCC's)**

**Proposed FCA National, State and Regional Model**

**[www.footballcoachesaus.org.au](http://www.footballcoachesaus.org.au)**

## **FOOTBALL COACHES AUSTRALIA INC**

### **1. Vision**

**'For Coaches, By Coaches ..... promoting and strengthening the reputation of football in Australia, and the reputation of Australian football on the world stage'.**

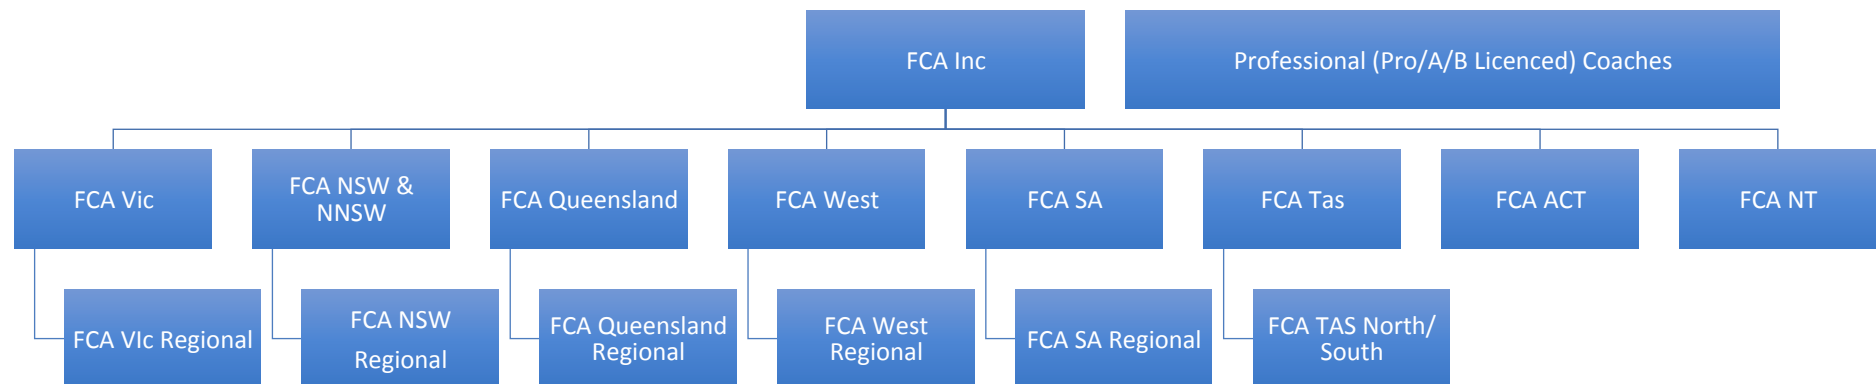

#### **1.1 Objectives**

Key objective of FCA is:

- **to support and align with the development and incorporation of future state and regional community coaching associations to significantly increase networking and mentoring opportunities for coaches.**

**These objectives shall be pursued on a global scale.**

#### 4. Proposed FCA National, State and Regional Model

## **"Single finance initiative" (SFI)**

**Source: PwC Jan 2018**

**"...benefits [of a SFI initiative] – will allow FCA (National, State, Regional Associations) to focus more time and resources on servicing their members and players."**

Streamlining the FCA communication channels and the financial processes between the National, State and Regional bodies creates capacity and allows for focus to be dedicated to developing the sport itself. Greater attention can be placed on event management, member participation and the overall impact Coach Associations can have on the community.

A SFI may improve the quality of controls, result in better transparency of information, promote more timely and consistent reporting and drive cost and efficiency savings. These benefits in turn allow Associations to focus more time and resources on servicing their coach members, players and the community.

### **Prerequisites to a "Single finance initiative" include:**

- developing the business case
- understanding the various IT systems employed and choosing a common platform
- documenting the range of policies and processes (formal and informal) of various Associations
- streamlining processes and optimizing controls
- developing an end state vision
- bridging the gaps and navigating stakeholders to a common, single set of policies and objective.
- Digitization of membership services,
- Data analytics,
- HR,
- Legal,
- Procurement
- Optimizing the purchasing power of the code rather than single Associations?

## Future Working Models

Source PwC April 2018

“It is clearly a time to rethink the risk culture from grassroots and communities through to elite and act decisively on what needs to change for the better. The future of sport needs to re-learn how to embrace integrity, fair play, humility and good behavior with moral and ethical foundations, setting strong examples for us all to follow. The task is to **“win the hearts and minds of our people, players, communities”** and to future proof the growth mechanism and platform for participation and the **next generation of football coaches, players & communities...”**

### Working together, can identify

- administration and processes that can be centralised (including legal, payroll, memberships)
- formalisation of roles and responsibilities; both within the member organisation and between them and the national body
- alignment of vision and consistency of initiatives, that removes duplication of non-value adding tasks and shares best practice across the sport.
